Nandita Talapatra

TECHNICAL PROJECT MANAGER | DATA ENGINEERING DELIVERY

San Francisco Bay Area, CA | 973-723-0647 | nanditatalapatra9@gmail.com | linkedin.com/in/ntalapatra | github.com/nanditatalapatra

PROFESSIONAL SUMMARY

Certified ScrumMaster with 12+ years in IT, including 5+ years coordinating technical delivery across data migration, cloud infrastructure and enterprise analytics. Experienced in Agile, Scrum, SAFe and Waterfall delivery, risk and dependency management, stakeholder reporting, release coordination and source-to-target reconciliation. Hands-on fluency in SQL, Python and data platforms supports close collaboration with engineering teams.

SELECTED DELIVERY RESULTS

- Managed a $500K cloud migration program across four Agile releases, coordinating 15+ data pipelines and eight source-system teams.
- Led ITSM migration activities across five data domains, achieving 100% source-to-target reconciliation and zero reported data loss.
- Supported delivery of 200+ production data pipelines across four enterprise programs and a 10M+ record banking data migration.

CORE CAPABILITIES

Program & delivery: Agile, Scrum, SAFe, Waterfall, SDLC, release planning, RAID logs, dependency tracking, sprint ceremonies, status reporting, cutover planning

Engineering & platforms: SQL, Python, PostgreSQL, Snowflake, AWS, ETL/ELT, Apache Airflow, dbt, Power BI; Jira, Confluence, Azure DevOps, ServiceNow, CloudWatch

PROFESSIONAL EXPERIENCE

Experis IT | Technical Project Manager | June 2023 - Present

- Led an ITSM migration program from WebHealth to Freshservice spanning 5+ data domains, managing scope, timeline, validation and stakeholder communication.
- Directed cross-functional engineering, data quality and business workstreams for automated migration and reconciliation, achieving 100% source-to-target reconciliation.
- Coordinated six Agile sprints and created Jira and CloudWatch tracking for burndown, blockers, data quality issues and delivery risks.
- Partnered with business stakeholders to establish acceptance criteria and drive pre-go-live data accuracy to 99%.

Cognizant Technology Solutions | Technical Project Manager | March 2022 - June 2023

- Managed delivery of 15+ cloud pipeline migration initiatives for Sanofi across three AWS environments, four Agile releases and a $500K budget.
- Coordinated eight source-system owners, data validation, governance controls and cutover plans, reaching 99.8% data integrity at migration.
- Strengthened audit logging, lineage tracking, access controls and executive reporting, supporting zero unplanned downtime.
- Improved monitoring and exception handling workflows, reducing manual intervention by 40% while sustaining 99%+ SLA adherence.

PROFESSIONAL EXPERIENCE (CONTINUED)

Wipro Technologies | Technical Lead / ETL Delivery | June 2011 - March 2022

Charles Schwab Bank | Web & mobile analytics

- Supported enterprise pipelines processing 100M+ daily events from seven sources for digital analytics and platform reporting.
- Contributed to workflow redesign from sequential to parallel execution, reducing processing time 60% and infrastructure cost 25%.
- Improved SLA adherence from 85% to 99%+ through structured validation and quality monitoring.

Capital One Bank | Data platform modernization

- Led delivery coordination for Teradata-to-Snowflake migration of 10M+ customer card records across six source teams.
- Managed source-to-target mapping, reconciliation, parallel cutover checks and audit reporting, achieving 99.9% accuracy at go-live and 35% faster queries.

ANZ Bank | Multi-system data migration

- Coordinated migration of 5M+ records into three target systems, achieving zero data loss and zero critical post-go-live incidents.
- Supported conversion of 20+ business rules into 50+ reusable data mappings/models and validation across test, UAT and production.

Lloyds Banking Group | Customer analytics platform

- Delivered 200+ production ETL pipelines across four programs for customer segmentation, behavior analytics and enterprise reporting.
- Supported schema governance, documentation and automation initiatives reducing manual source-validation effort by 30%.

SELECTED INDEPENDENT PROJECTS

- **AML transaction monitoring:** SQL-based rule checks for structuring and transaction velocity in PostgreSQL; workflow practice using Apache Airflow.
- **E-commerce data pipeline:** Python ingestion and PostgreSQL data organization across raw, public and analytics schemas.
- **SQL job market analysis:** PostgreSQL queries exploring salary, skill demand, joins and CTEs; published code on GitHub.

EDUCATION & CERTIFICATIONS

Master of Technology in Software Engineering - BITS Pilani

BS in Computer Science - West Bengal University of Technology

Certified ScrumMaster (CSM) - Scrum Alliance | Leadership Skills - IIM Ahmedabad | Agile Project Management & Delivery

RECOGNITION

Wipro Star Performer (2017) | Wipro Delivery Excellence Award (2021)
